

GRIDSMART System

World's only single camera system for intersection control and traffic data collection.

General Traffic Controls is now a distributor for Gridsmart. We, as a company, are very excited to be working with Gridsmart and showing our customers the great product that Gridsmart has to offer. Below you will find facts about the camera system and pictures of what it actually looks like. You can also click the links and it will take you to their website with further details.

Key Facts

- * Gridsmart is a camera-based system that helps change traffic lights in response to traffic demands.
- * Gridsmart System collects important traffic and safety data and can automatically provide proactive answers to traffic personnel.
- * Gridsmart is simple to install and has easy maintenance, thereby preventing lane closure, improving worker safety, and reducing costs.
- * Gridsmart can easily be integrated into larger, diverse systems.
- * You can learn to run the Gridsmart Client in 30 minutes or less.
- * Gridsmart counts vehicles and measures performance automatically, 24 hours a day, 365 days a year, at the fraction of the cost of short-term count studies.
- * Gridsmart does not read license plates and cannot see faces.
- * Gridsmart is installed in more than 3,000 locations worldwide.
- * Gridsmart is the only video product assembled proudly and completely in the USA.

Camera

Industry's only horizon-to-horizon views with its iconic bell camera.
