

Get your cabinet checked to ensure it's working properly.

## Preventative Maintenance

### *Dirty cabinet? Clean it up!*

It's time to start thinking about getting your cabinets checked and making sure they are in the best shape for the upcoming months.

We inspect the entire intersection and the inside of the traffic signal cabinet. We will provide a detailed list of equipment that requires attention.

**Any equipment quoted at this time will receive a 20% discount!!**

**\*\*All signal monitors older than 18 years are obsolete and cannot be repaired or re-certified due to parts availability.**

Having your cabinet checked regularly ensures you are providing a safe intersection to the public and making sure your equipment is running as efficiently and precise as possible.
